Invenshure

Job Posting – Full Stack Web Developer w/Front End Emphasis

Role Description

At Invenshure, we build companies that change the world by turning hard problems into thriving companies. We are a technology incubator with a world-class scientific and product development team focused on developing and deploying emerging technologies primarily in scientific research, medical diagnostics, medical therapeutics, and cloud computing markets.

We are seeking a multidisciplinary Full Stack Web Developer to join a growing and experienced team of developers and scientists.

The position will likely involve aspects of the whole stack. However, the ideal candidate will be well versed in front-end development and will be able to build a beautiful user interface efficiently and know how to implement fast, elegant code. We value self-motivated individuals who work well in a collaborative environment, constantly generating and sharing new ideas with the team.

Responsibilities

- Develop and maintain web sites and web applications
- Develop and maintain complex backend systems
- Build scalable cloud based web/backend applications
- Have a general understanding of good UI practices and work closely with UX and design to refine and improve user experience
- Leverage open source technologies
- Make data driven decisions to improve stability and performance
- Implement tests at all levels of the stack

Required Skills

- Bachelor's Degree in Computer Science or related discipline
- Passion for front end with demonstrated strong web UI portfolio
- 3+ years experience developing responsive applications for web and mobile
- Exceptional proficiency using HTML5, CSS3 and JavaScript
- Experience with using backend web frameworks (ex Flask, Ruby on Rails)
- Extremely comfortable with Linux
- Strong oral and written communication skills – you believe that an idea that can't be expressed clearly to your peers isn't yet a good idea.
- Great organizational skills with an attention to detail, consistency, and simplicity

227 Colfax Ave N, Ste 148, Minneapolis, MN 55405
Land // 612.520.7361 Fax // 612.225.1803

Preferred Skills

- Experience and desire to implement testing framework
- Experience using frontend JS and CSS frameworks (ex AngularJS, Bootstrap, Riot.js)
- Experience using LESS, SASS/SCSS, or Stylus
- Concern for design and accessibility
- Rapid, iterative prototyping experience
- Cloud based data software architecture (ex AWS)
- Distributed message queues (ex RabbitMQ)
- Automated deployment tools (ex Ansible, Docker, Fabric)
- Medical software development experience

If interested, please send a resume and cover letter to careers@invenshure.com
