WE BUILD COMPANIES TO CHANGE THE WORLD

www.invenshure.com

Web Application Developer for our Budapest, Hungary office

Role Description

Invenshure is a technology incubator company with a world-class scientific and product development team focused on developing and deploying emerging technologies primarily in medical diagnostics, medical therapeutics, and cloud computing markets.

Invenshure opened an R&D office in Budapest, Hungary to help to grow its talent pool. In this new office we have an open position for a multidisciplinary (full stack) Web Application Developer to join our growing and experienced team of developers and scientists to create world-class web platforms.

The ideal candidate can build a beautiful user interface efficiently and knows how to implement fast, elegant, portable, multiplatform code. We value self-motivated individuals who work well in a collaborative, multi-location environment, constantly generating and sharing new ideas with the team.

Responsibilities

- Develop and maintain web applications
- Collaborate with stakeholders to refine and improve user experience
- Make code-level UI and UX decisions
- Build scalable cloud based web applications
- Create data processing platforms using open source technologies
- Make data driven decisions to improve stability and performance
- Implement test driven development at all levels of the stack
- Work with stakeholders to understand and document software requirements and ensure applications meet functional requirements

Required Skills

- Bachelor's Degree in Computer Science or related discipline
- 3+ yrs experience developing web applications
- Passion for front end with demonstrated strong web UI portfolio
- Exceptional proficiency using HTML/CSS/JavaScript
- Highly skilled in Python and experience with Python web frameworks
- Extremely comfortable with Linux
- Knowledge of how the web works from TCP to HTML
- Strong oral and written communication skills - you believe that an idea that can't be expressed clearly to your peers isn't yet a good idea.
- Great organizational skills with an attention to detail, consistency, and simplicity

Preferred Skills

- Experience and desire to implement testing framework
- Distributed message queues
- Automated deployment tools
- Cloud based data software architecture
- Medical software development experience

If you are interested in joining our team, please send your application with an English CV to Melinda Ladanyi melindaladanyi@invenshure.com.
