

Job Posting – Front End Developer

Role Description

At Invenshure, we build companies that change the world by turning hard problems into thriving companies. We are a technology incubator with a world-class scientific and product development team focused on developing and deploying emerging technologies primarily in scientific research, medical diagnostics, medical therapeutics, and cloud computing markets.

We are seeking a Front End Developer to join a growing and experienced team of developers and scientists.

The position will likely involve aspects of the whole stack. However, the ideal candidate will be specialized in front-end development with the ability to build a beautiful user interface efficiently and implement fast, elegant code. We value self-motivated individuals who work well in a collaborative environment, constantly generating and sharing new ideas with the team.

Responsibilities

- Develop and maintain web sites
- Build single page applications for the modern web
- Have a general understanding of good UI practices and work closely with UX and design to refine and improve user experience
- Leverage open source technologies
- Make data driven decisions to improve stability and performance
- Implement tests

Required Skills

- Bachelor's Degree in Computer Science or related discipline
- Exceptional proficiency using HTML5, CSS3 and JavaScript
- Passion for front end with demonstrated strong web UI portfolio
- 3+ years experience developing responsive applications for web and mobile
- Comfortable with Linux and the command line
- Strong oral and written communication skills – you believe that an idea that can't be expressed clearly to your peers isn't yet a good idea.
- Great organizational skills with an attention to detail, consistency, and simplicity

Preferred Skills

- Experience using frontend JS and CSS frameworks (ex AngularJS, Bootstrap, Riot.js)

- Experience using LESS, SASS/SCSS, or Stylus
- Concern for design and accessibility
- Rapid, iterative prototyping experience
- Medical software development experience
- Experience with using web frameworks (ex Flask, Django, Laravel, Ruby on Rails)
